

Episode	Stage	Focus	Key Technologies	Deliverables	Success Metrics	Source
PILOT: "The Field Pilot / Proof of Concept"		Build the absolute baseline FEP	Termux (Android), Python	fep_runtime.py (runtime)	Agent responds to queries	1
EPIISODE 1: "The Local Porting"	Local Porting	Port the FEP runtime to Windows	Windows 11, WSL2	fep_monitor.py (monitoring)	Runs on Windows	1
EPIISODE 2: "The Library Development"	Library Development	Build a library of reusable agents	GitHub, Local machine	fep_agents/ library	20+ working agents	1
EPIISODE 3: "The Machine Learning Integration"	Machine Learning	Add machine learning capabilities	Tiny ML models	LearningAgent class	Agents improve over time	1
EPIISODE 4: "The Hybrid Coordination"	Hybrid Coordination	Coordinate multiple agents	Claude (Cloud), Local	field_config.py w/ agents	5+ different models	1
EPIISODE 5: "The Production Deployment"	Production Deployment	Deploy FEP to handle real requests	Real web service	Production-grade FEP	FEP handles \$100k requests	1
SEASON FINAL: "The Academic Publication"	Academic Publication	Write and submit a paper	LaTeX, GitHub	Formal White Paper	Paper submitted	1
